A: The executable is minitab21-full-academic-edition-10-3-0-13.50.7z which you can download here. It's a full version of the Minitab Pro software. Open the minitab21-full-academic-edition-10-3-0-13.50.7z and extract it. Minitab will open. You can download the paid version of Minitab Pro here. The executable for the minitabpro15.zip file is minitab15crack.exe. Extract it. Open the MinitabPro.exe file. It will open Minitab Pro. Select the Minitab Professional Version from the left sidebar. Select the License Type. Download the Minitab Professional Keygen from here. Open a Notepad or NotePad++. Add the license key and save it as minitab15.txt. Close the Notepad. Open the minitab15.txt file. Enter the license key. Close the Minitab Pro. You can download Minitab Pro Serial Key from here. Q: Error in Getting Values from Attributes of a Tag with Jsoup Hello everyone I have a problem with Jsoup library in android. I have to retrieve a value from an attribute of a tag. Example: HtmlElement e = doc.select("span[data-target='1']").first(); String att = e.attr("data-target"); log.i("attribute", att); // returning 'null' The html code: one two Thanks in advance. A: You can use: String att = doc.select("span[data-target='1']").attr("data-target"); Have a look at the docs, jQuery syntax would be: one two String att = doc.select("span[data-target='1'] 82138339de
