This document assumes you have a web browser, and are running AutoCAD from a desktop or laptop computer that has an internet connection, either by being connected to a network or by using a wireless device. First, you must log into your AutoCAD session. If you are using the AutoCAD Mobile app, you simply need to open a web browser on your phone. A small button on your mobile device will open the AutoCAD mobile app. You can also sign into your AutoCAD Mobile app using the same sign-in you use for desktop or laptop computers. For additional instructions on opening a web browser on a mobile device, please see our AutoCAD mobile app help page. If you are using a desktop or laptop computer that has an internet connection, please open up a web browser. Your computer may have one or more browsers available. For example, Microsoft Edge on a Windows operating system has been recently renamed to Microsoft Internet Explorer but is still an Internet Explorer web browser. Chrome and Firefox are other browsers that can be
