In 1983, the first edition of the AutoCAD Free Download program contained a basic 2D drawing feature that supported the drawing of both 2D and 3D drawings.

---

In 1984, the original AutoCAD version 2.0 was released. The AutoCAD LT version was later introduced. AutoCAD was originally used by the automotive industry, but now it is used by other industries such as architecture, engineering and construction (AEC), architectural and interior

---

design, power, medical, and entertainment. As of 2014, AutoCAD has about 100 million licensed users. For example, the United States Naval Academy uses AutoCAD and other AutoDesk applications, including AutoCAD LT, to design various vessels and equipment. AutoCAD is a registered trademark

---

of Autodesk, Inc.

AutoCAD LT is a trademark of Autodesk, Inc. What Is AutoCAD? AutoCAD is a commercial CAD software program that is used to design and draft, create, and modify 2D and 3D drawings and models. The AutoCAD application runs on the Microsoft Windows,

Anaheim... on the  
BIRTHDAY of a dear,  
dear friend of mine... (not  
in attendance)... We'd go  
together - always have,  
always will - since the  
early '80s. I can just see  
my youngest daughter  
getting up before her 1st  
day of kindergarten - and  
we're no longer together -  
and she remembers -

---

"WHERE was I that day?"  
- and she remembers - and  
we never knew that -  
WHO was it? Well, we're  
standing outside - looking  
at the Stone Temple Pilots  
- there to celebrate - a part  
of our history... and  
something much bigger  
than that - a part of our  
commonality... I think  
about how much that boy

---

wanted to be me - just for that day. And I'll never forget that day - my heart feels like it can break, because it still does - even with 25 years gone... And I think about my dear friend - and the time that we shared - and I'm glad that it happened... because it helped me be a better person, so it all ends up

---

being good... And I think -  
"Thank you..." And I think  
- "It's only fair... if it's  
good... it will end up  
being good..." Well, as for  
me, I'm just so happy to be  
here... to finally be here...  
celebrating this moment...

It's better to laugh in  
sorrow - than to cry in  
happiness - some even  
think that I'm crazy... but

---

it's true - that's the truth...  
when you're in this frame  
of mind, you don't mind  
what they say about you -  
because you know you  
have nothing left to hide...  
I know I'm not the only  
one... there's a secret code  
that we share... a shared  
connection - an  
understanding... And that's  
what makes me
