Crack For. 2020Proserpine and South Coast Trains passengers will again be forced to change at Gatton when work begins on the East-West link project. The new rail line will follow the old East-West rail corridor through the Illawarra, with major modifications to the current track and stations in the Illawarra and South Coast. Makers of the \$7 billion project are making the new rail line the first part of the East West rail project and moving services through Gatton away from Wollongong's CBD. Premier Mike Baird said on Tuesday the Government will invest \$300 million to upgrade the existing rail line between Wollongong and Gatton. "The Government has made a significant long-term commitment to the people of Wollongong and their local MP, Bob Webster, as he helps us deliver this new line," Mr Baird said. "With a focus on making a difference in the lives of local people and businesses through positive infrastructure investments, the NSW Government is working to get on with the job of providing better transport options for this growing region." The Government has already announced two major engineering projects to provide for commuters and shippers moving their goods on the Trans-Pacific Highway and Illawarra railway lines. Opponents of the project are calling for two new underground stations to be built and a redirection of freight movements off the Kings Highway. A popular staging and maintenance area at Gatton is also planned for the new line. "We are also significantly improving our local links throughout the Illawarra, providing new train services, and are making sure that the best possible service is maintained," Mr Baird said. "The new East West Rail project is an example of how the Government is working with local communities and industry to get on with the job of providing better transport options." The Illawarra Mercury has learned that a four-hour delay will be introduced on East West train services as a result of the new line.
