Q: Swift 2: Can I use escaped characters in my iOS app? I created a stopwatch app for iOS. I am having trouble naming elements, so I'd like to use the `\u250c` instead of `\r`. I want to use the name of a second in my Stopwatch class, but it is throwing an error. Can I use escaped characters? Is there a way to escape the below? The error: "Cannot convert value

of type 'StopwatchController' to expected
argument type 'String'"

```
appDel.addStopwatchController(stopwatch)  
self.navigationController?.pushViewController(  
    ler(stopwatch, animated: true)  
    stopwatch.initialize()  
    stopwatch.counterFormat = "hh:mm:ss"  
    self.stopwatch.start() A: You need to use  
single quotes. Otherwise you will escape the  
escape characters in your string. I tested  
your code and found this is the line that is  
causing the error. The "hh:mm:ss" isn't  
being parsed into a string.  
self.stopwatch.counterFormat = "hh:mm:ss"
```

(To use the keyboard shortcuts to enter
Photoshop, select “Use Keyboard Shortcuts”

in Preferences. To access Photoshop Elements tools, press the E (Equivalent) key. To access Photoshop features, press the C (Compose) key.) Photoshop is a much more capable image editing program than Photoshop Elements, but it costs thousands of dollars and some people want to stick to a free alternative. The most useful feature of Photoshop is the ability to apply layer effects and create various design elements in layers. Layers can be stacked and organized to build up complex images. But, if the idea of layers intimidates you, you might want to try an alternative program, such as Photoshop Elements. The interface, the “layers” features, and the selection tools are easy to use without the fear of breaking your project. You can find other free software, of course, but we’ve tried to pick

programs that have the best built-in layer tools and the easiest to use tools. There are also programs that have additional layers and tools, but let's focus on the programs that you'll use to edit your images. Give the features a test-drive. If you can work with a program without any problems, you should be confident that you can make great images with a program. It's good to try a few different programs, though, so you can better compare their respective advantages and disadvantages. We've picked four alternatives to Photoshop Elements that we consider the best for most users. After testing them, we've decided to highlight the three most popular. You might want to try all three. All three programs have similar tools and a similar look and feel. But Photoshop has a number of more advanced

tools you need to master. In particular, Photoshop has a collection of advanced tools that allow you to tweak settings and create new effects. With Elements, some of these tools are only available as plugins. That means they're tucked away in a folder that you need to install manually. WPS Elements is one of the most popular free software alternatives to Photoshop. There are several reasons why you might want to use it: It has mostly free plugins. Some of the free plugins are essential for the functionality of the program and others are optional extras. With some programs, you need to purchase plugins to use some of the advanced Photoshop tools. 05a79cecff

Sheriff's officials in Southern California are warning that two decades of capturing cats for surgery might not be enough. The SPCA of San Bernardino County has received about 40 cases a year of cats that have had their hips or shoulders surgically reduced

for luxating patellas, which is caused by poorly developed ligaments. While that's a surgery that has become increasingly common, it involves a procedure that involves sedating the cat, often to the point where it loses consciousness, for hours. That means recovering the cat doesn't happen for a month or two. Those cats could also be in pain for years, said Dr. Dennis Schroeder of Laguna Hills, who is running an investigation of the practice. He said cat owners often don't report the surgeries until they're conscious, often after the procedure is finished, and often don't understand the real cause of the cat's pain. "It's a vicious cycle," Schroeder said. Four Laguna Hills veterinarians have performed surgery for about eight years on about 30 cats. In addition to Schroeder and Dr. Shafiq

Rasool, lawyers for the animal welfare group said they also represent two other veterinarians in the state who have performed the surgery for several years. The group released a study Thursday that said the surgeries often lead to a lifetime of pain for the cats. RELATED: Why isn't the low-cost, high-volume surgical reduction of luxating patellas a standard of care for cats? Animal advocates said that the surgeries have become more common as veterinarians have become increasingly comfortable performing them and have expanded the list of patients who can be treated. They note that the surgeries, which have been performed for a decade or two in some parts of the country, have become commonplace in California. Eugene Matyas, senior vice president of the Humane Society of the

United States in Washington, D.C., said that California veterinarians are among the leaders in the country for performing the surgeries. “They’re definitely the leaders,” Matyas said. Chris Reynolds, a Sacramento attorney who represented the animal rights group in a lawsuit against the owners of a Laguna Hills veterinary hospital that performed the surgeries, said that the surgeries were part of an effort to expand veterinary care. “It’
