NFS : Rivals | From the makers of Burnout comes the world's first true next-gen racing game: Need for Speed: Rivals. A race unlike any other, where you'll have the opportunity to race against AI opponents from around the world, or play head-to-head against humans to prove yourself. FEATURES Race on destructible environments from coast to coast and underground. Races will take place across a variety of different vehicle-infested locales, including landmarks from real-world cities and other locations. RIDE YOUR OWN LOADOUT A custom or favorite driver's inspired loadout system allows you to customize your character and vehicle with all kinds of gear and perks. NFS HEAT Rivals's trademark engine is Need for Speed: The Fast and The Furious. It's tuned to be everything you expect from a high-octane, high-performance title. NFS RIVALS Rivals puts everything you loved and lost in The Fast and the Furious back in your hands. Just as it was in The Fast and the Furious: Tokyo Drift. TRANSMOGNETIC PERFORMANCE One of the core features of Need for Speed: Rivals is the Transmogripher, a new technology that keeps your driving look fresh, even during long races. Get to the next level with Overdrive and don't let up. Need for Speed Rivals has a smidgen of reality creeping in with the addition of Need for Speed: Underground's world map. You can still end up in a non-objective driven chase by some ignorant driver, but you'll at least have some idea where to go. Chase down those who owe money and force them to drive you to the IRS in a race to see who will win the fastest run. Unlike other games, you can't just steal other cars and go; you have to win your way into other drivers' cars (using the game's new upgraded heist functionality). Have a friend play as the AI, or switch to a second player in certain multiplayer modes. Need for Speed Rivals was designed to be a beautiful game, and features a completely rendered 3D engine.
