FILE PHOTO: The ticker and trading information for Apple is displayed at the post where it is traded on the floor of the New York Stock Exchange (NYSE) April 4, 2012. REUTERS/Brendan McDermid/File Photo LOS ANGELES (Reuters) - Apple Inc's largest ever product recall is an attempt to curb the growing prevalence of lithium-ion batteries in consumer electronics, but may also deter some consumers from buying the iPhone XS, which went on sale on Friday, a U.S. consumer group said on Friday. Apple's recall, the tech giant's third-largest, has been the subject of dozens of news articles in the past week, including an opinion piece in the New York Times that said the company was seeking to address a "liability that has grown increasingly problematic" because of the technology. The recalls have been among the more serious of a series of quality problems that have dogged Apple's new iPhone, which went on sale on Friday after an initial glitch prompted a wave of tech sites to swap out their devices on Friday and prompted Apple's senior vice president of software engineering to apologize for the malfunction. "One in every six lithium ion batteries in the U.S. have already been recalled," Dan Clifton, a technology policy researcher at Strategas Research Partners told Reuters. "It's a big deal and I think it will deter people. Apple is testing two variants of the phone, the XS and the XR, for the next couple of months and it's going to be the XR that will sell more units," Clifton said, adding that Amazon.com Inc's Fire phone also has the same problem with battery. Apple's recall comes as solid state batteries are poised to grab the global market because of lower costs and durability, and could give Apple a competitive edge in the future. Most of Apple's top products are running on the lithium-ion battery - including the iPhone XS and the iPad Pro - which has been used on other smartphones and tablets for years. Earlier this week Apple released the much-anticipated iPad Pro 2018 in China as it looks to take market share from local rivals. The iPhone XS series will come in two sizes: the 7.1-inch (185.5 mm) XS Max and 5.8-inch (158
