The 7th Seal is a free, tactical, strategic board game that takes place in the vacant world after the passing of the previous king. His Only Daughter, the heir to the kingdom, is now your queen and you find yourself next in line to take the throne. You are given 6 seals, entrusted to 6 noble houses. The fate of the realm is at stake. The fate of the realm is your fate. Be as good as your word, use it wisely. The 7th Seal is meant to be a skill-based board game with easy to learn rules, while being challenging to master. In the game, you use your own strategy on the battlefield to take over every piece of land on your opponent's board. The outcome depends on your ability to manipulate the warlord tiles and conjure up spells at your best for your troops to fight for your claim. This is a story from Battle of Maldar. It is a Strategic turn based game but I tried to make the gameplay something like "Settlers of Catan". You must use your road network to transport your army between military points. And I added another unique feature which you can find in following image. Each figure has "tact" value which is define as "Tacit is a figure in a battle. A tact is a figure of a battle who is fought without bloodshed but who is crucial to winning or losing". You can see a tact when you hover over it. You must have tact value to move the figure on the board. When your troops pass this tactical point(tact points on the board), they will gain morale points and eventually win the battle. If you don't place your troops on the battle point(tact point) by the end of your turn, enemy troops will take it over. This is a strategic aspect of the game. Also I implemented another unique feature which you can see in the following image. You can't move around the world alone, you must use bridges and roads to transport your troops to better positions. It is like Diamonds in the Army in a way. However, the troop has the health of one soldier. You must be sure to place troops on tact point by the end of your turn otherwise they will die. I try to make this game easy to learn but challenging to master. If you are interested in the game, you must check out the following link:

Each time you hit one of the axes that is thrown, you add an additional axe to the lane, so you have many more to throw in a row. If you hit the left side of the board, it doesn't add an axe, if you hit the top it doesn't add an axe either. The fastest lane to use up all of the axes will be the one with the most limited amount of time. Game "Insect Adventure" Gameplay:

0 Oct 30, 2012 (New Sound): I've been listening to quite a lot of Lovecraft lately, and one thing I noticed is that most of the games tend to use the same track for most of their games. I tried to find some sort of "album". I decided to make something like a tab from the trailer, and then a tab with a few of the best songs from the game on them. It's not finished, but it's more than a fresh take on the concept. There's still quite a lot to improve; the idea is still one of the bigger suckers that is never finished. It took me a week to finish the art for the butthurt. I started with a very rough sketch. I didn't really know how to pull this kind of style off, so I decided to hand draw it. But I really hated the art at that point, so I spent a lot of time fixing up the lineart, changing the perspective and adding colour where needed. I still like the art I gave, but after doing the orks, I was too proud to change it. I started off with really nice, intensive colouring. The vector graphics with the very vibrant colours were one of the things I really liked so much. It gave the concept much better vibes. I have to be honest, when the Wii U GamePad reveals came out back in the spring, I was skeptical. I was skeptical of the form factor, the size, the always-on nature, the lack of dedicated buttons... I had all the same issues with the controller the PS3 and 360 have. I had reservations until I saw this video of a B-Spec Mario game being played. That video resonated with me and broke me out of my prior position. I got a Wii U and the levels of difficulty and fun it gives me, as opposed to the way PlayStaton has been acting more than lately, is truly excellent. The actress tweeted out a picture of the pizza with the words: "Make a sweet gift for a special guy. Use this coupon for a FREE family size pizza, munchkin subs or TWELVE (whoa!) free slices!"
