File Structure: This Package doesn't have a "file\_structure.json". Additional Notes: This package is delivered with 3d models ready to be edited but they're not scene files from S2Engine HD database. Some models are scene files with added textures, some models are scene files with some mesh node rigging and some models don't have any mesh node rigging. With this Package you'll have access to the models but you're not asked to modify them in any way, you can just use them as they are or you can assign or delete some modifiers, poses, animations, lighting, texture or sound clips you can see in the Preview Poses/Animations/Animations Groups tabs. Please, note that some 3d models included in this Package were included in this package because I wanted to offer them to you on one large pack rather than making them individually available in smaller, stand-alone packs. For my Packages I'm using 3ds max and daz3d. For 3ds max I use the psd to dxf importer in 3ds max to import the psd files, then I load them in 3ds max to animate them with various poses and animations. I also make use of the daz3d mid/high polysmooth process to smooth the polys. Also, this Package doesn't include any of the assigned sounds included in my Packages, if you want to purchase any of my sound packs then I suggest you purchase them separately as I won't be renewing them for any of my current Packages. I also suggest you contact me about customising my 3d models but don't expect me to do it at this time as I have so many customised packages. License: I grant you permission to use these 3d models
